

# CHAMP OSA™

## More drilling, less standing time

### Survey every time you pull core with Champ Gyro™ in a Champ OSA™

The Champ OSA™ (Overshot Assembly) is unique running gear which allows you to run a Champ Gyro™ survey as you retrieve a core sample. This innovative approach eliminates the need for a separate survey run.

- ❑ Significantly increases drilling productivity
- ❑ Integrates with any standard overshot and can be run in rod sizes from B to P
- ❑ Allows for wireless data download at surface
- ❑ Enables the driller to confidently run surveys without complex and time consuming setup procedures.
